

In cooperation with:

Institute for Pure & Applied Mathematics
An NSF Math Institute at UCLA

This summer, G-RIPS@Berlin

Research in Industrial Projects for Graduate Students June 25 to August 17, 2018

What

Apply your math skills to cool, real world research projects sponsored by industry. Work with fellow students who come from across the country and around the world, and who share your strong interest in math. Learn about careers that use math. Develop research skills. It all adds up to one great summer!

Who

RIPS students come from many different academic fields, but all share a strong background and interest in mathematics. Final year master students and current PhD students are eligible to apply. The selection process is competitive!

The Deal

RIPS participants will receive free travel to Berlin and free housing. During the project you will have an office at Freie Universität Berlin and work in an international team of four students.

Application deadline April 15th, 2018
